

PRESENTATION OF AN ACTIVE WINDOW IN A TERMINAL AND METHOD OF USING SAME

ABSTRACT

A method and device are provided for accessing the internet. A first internet web page may be accessed using a terminal. The first internet web page may be displayed on a display of the terminal. Features of the first internet web page may be displayed within a first active window of the terminal. A user may subsequently select the first active window and have a browser reaccess the first internet web page. The first internet web page may then be displayed again on the display.
